

Project Proposal
Gabriel Luong
996268275

Project Choice: Project 4

To tackle the project, I will be doing the following:

- Reading up on structure-from-motion:
 - Bundler: <http://www.cs.cornell.edu/~snavely/bundler/>
 - SFMedu: <http://vision.princeton.edu/courses/SFMedu/>
- Reading up on the ICP algorithm and implementing it
 - http://en.wikipedia.org/wiki/Iterative_closest_point
- Obtain 3D CAD models from <http://www.cs.toronto.edu/~fidler/projects/CAD.html>
- Learn about the format of EPFL car viewpoint dataset
- Look into how to utilize the CADcode and models and how it fits into the point cloud
